CRR ANIMAL HEALTHCARE

CRR ACIFITE-PH

ORAL LIQUID

CRR ACIFITE-FS

Highly concentrated acidifier premix for improving functional gut health

- Acidifier with more than 60% total acid content
- High concentration of Formic acid
- Combination of four selective organic acids (short chain fatty acids)
- Enriched with orthophosphoric acid

Key Benefits

- Stabilizes the gut pH
- Improves peptic digestion
- Control Salmonella and reduces gut pathogen load

Usage Recommendation

Through drinking water :

2-4 ml per 10 litre of water

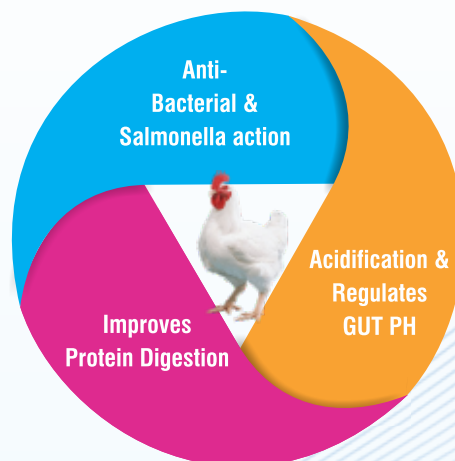

Clean your tank and pipeline system with any Aquacleaner before using ACIFITE-PH

Pipe Cleaning 20-40ml / Ltr of Water

Usage to be increased on hardness of the water

Stop using ACIFITE-PH in drinking water

12 hours before Vaccination

Feed - Layer : 500 gm per ton of feed
Broiler & Breeder: 1 to 2 kg per ton of feed
 or as directed by Nutritionist

Acifite-PH/FS Advantages

Formic acid	• Reduces general bacterial population in gut • Reduces bacterial populations with special emphasis on controlling E.coli, Salmonella & Campylobacter • Holds promise as an agent to control necrotic enteritis in poultry gut
Propionic acid	• Antimicrobial effect, improves gut health, improves feed intake. • Butyric acid optimizes gut motility, reduces colonization of Salmonella, Campylobacter & maintains strong gut lining. • It inhibits bacteria, enhances nutrient digestibility and improves overall gut health & performance.
Butyric acid	
Benzoic acid	
Orthophosphoric acid	• Stabilizes gut pH starting from crop to lower part of small intestine. • Improves peptic digestion • Reduces intestinal pathogens by intestinal media acidification.

CRR NEOTEN-PLUS

THE PERFECT COMBINATION FOR ANTIBIOTIC GROWTH PROMOTER

Composition

Each 1 Kg Contains

Lincomycin	10%
Neomycin Sulphate	10%
Tinidazole	20%
Sodium Citrate	10%
Excipients	QS

Usage : Prevention

Broiler : 100 gms / ton of feed 5 to 7 days

Layer : 100 gms / ton of feed 5 to 7 days

Breeder : 100 gms / ton of feed 5 to 7 days

Treatment :

For the control of Necrotic entities and other infections @ 500 gms to 1 kg per ton of feed

Or as directed by veterinarian / consultant

Benefits

- Broad spectrum activity effective on both gram Positive & gram negative bacteria
- Reduces the incidence of bacterial diseases
- Most suitable to use during viral infections to prevent the Secondary bacterial infections
- For increase bodyweight improves feed efficiency
- Helps to increase the egg quality & production in commercial Layers
- Helps to increase the fertility & Hatchability in Breeders
- Prevents the diarrhoea of bacterial origin of protozoa and some of coccidia
- As an aid in the control of Airsacculitis

Advantages

Lincomycin

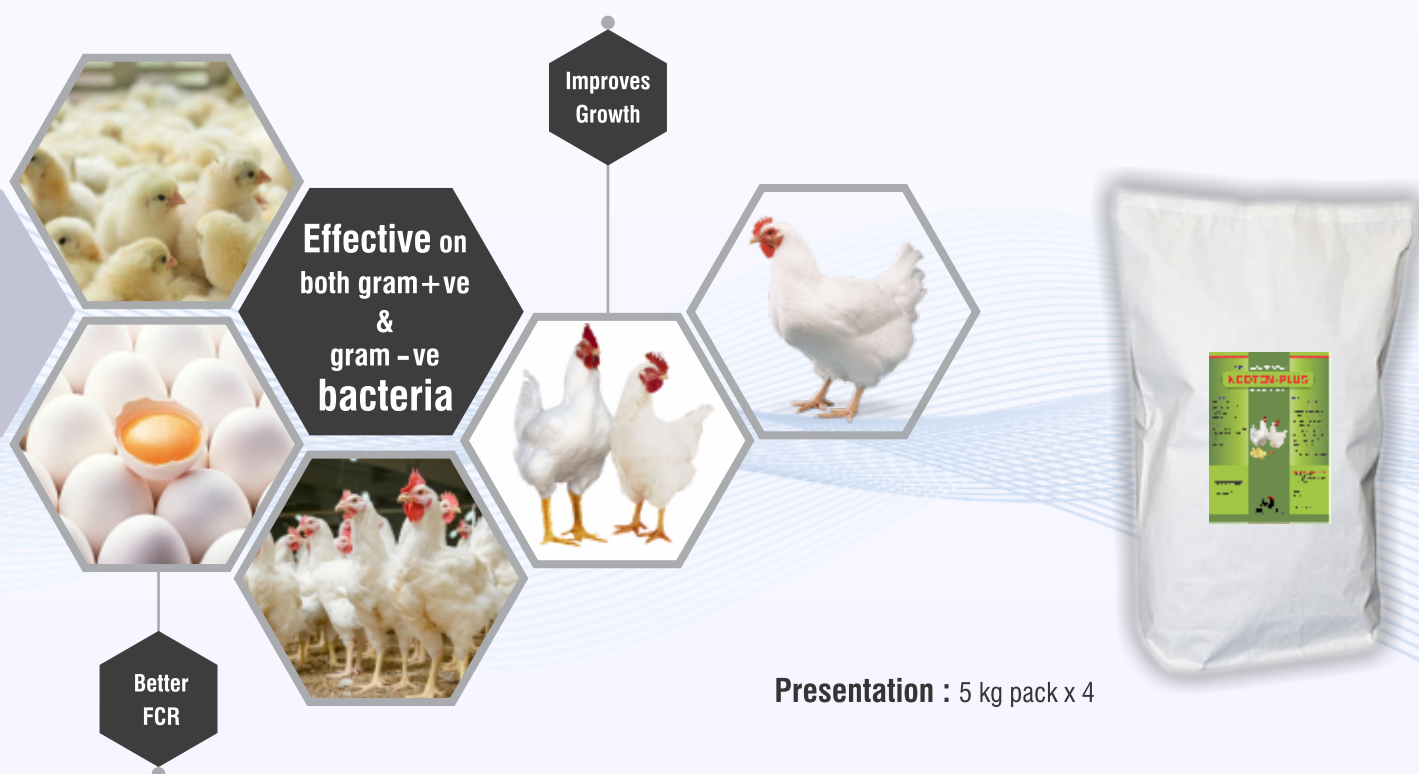

Highly effective against mycoplasma, gram-positive and anaerobic bacteria (esp. Clostridium spp.) It is fast acting and gets readily absorbed from intestine.

Neomycin Sulphate

- Neomycin is broad spectrum bactericidal antibiotic having strong action against gram-negative and gram-positive bacteria (E.Coli, Salmonella, Clostridium etc.)
- Very effective in controlling enteric infection.

Tinidazole

Effective against most of protozoa and some of coccidia.

CRR Stressout-Tonic

A Multi Vitamins, Electrolytes & Amino Acids
Anti-Stress Formula Fortified with Probiotics.

Composition Each 5ml contains

Vitamin A Palmitate	62000 IU
Vitamin D3	31000 IU
Vitamin E	250 mg
Vitamin C	6 mg
Vitamin B2	6 mg
Vitamin B3	12 mg
Vitamin B5	35 mg
Vitamin B6	6 mg
Vitamin B12	125 mg
DL- Methionine	15 mg
Elemental Sodium	1.50 mg
Elemental Phosphorus	1.00 mg
Elemental Potassium	1.10 mg
Elemental Chlorides	1.00 mg
Elemental Zinc	5 mg

Probiotics

7 Probiotic Cultures	5.6 billion cfu/g
----------------------	-------------------

INDICATIONS

Managemental - During Deworming, Grading, Shifting, Debeaking & Vaccination

Nutritional - Nutritional Deficiencies, Sudden Deprivation in feed / water

Physiological - High egg production and faster body and weight gain

External & Internal Environment- Extreme cold/ heat, poor ventilation or Disease.

FEATURE & BENEFITS

- Optimizes chick health
- Assures bioavailability of vitamins and amino acids in highly concentrated form.
- Improves growth, weight gain and immunity.
- Prevents laying drop and maintains laying peak for longer duration
- Importance of Probiotics: Pathogens like *Escherichia coli*, *Clostridium perfringens*, and *Salmonella* are rising due to reduced antibiotic use in poultry. A Healthy gut and natural solutions are key to boosting bird health and overcome the challenges.

USAGE

Grower & Broilers - 1 to 2 ml/ ltr

Layer - 1 to 2 ml/ ltr

Breeder - 3 to 4 ml/ ltr

For Large Animals

Cows - 15-20ml

Sheep & Goat - 10-15 ml

or as advised by veterinarian/consultant
