Qualisperm

Advanced Rooster
Sperm Quality & Volume Enhancer

Key Ingredients & Their Benefits

Qualisperm is formulated with natural, research-backed extracts that improve sperm quality, motility, and fertility in breeder roosters. The formula is enriched with antioxidants and testosterone-supportive compounds that enhance overall reproductive health.

- Boosts Sperm Concentration & Count
- Enhances Motility & Vitality
- Elevates Testosterone Levels
- Protects Sperm DNA from Oxidative Stress
- Improves Fertility & Hatchability Rates

Preliminary poultry trials indicate marked improvement in sperm quality and vitality when used consistently in breeder roosters.

Why Choose Qualisperm

- **Science-Backed Formula** : Developed with clinically studied herbal extracts to improve rooster sperm health and fertility potential
- **Comprehensive Reproductive Support** : Enhances sperm count, motility, testosterone levels, and antioxidant defenses for optimal reproductive performance.
- **High Potency & Purity** : Made with standardized, concentrated extracts for consistent results.
- **Quality Assured** : Manufactured in an ISO-certified facility with strict adherence to poultry safety and quality standards.
- **Natural & Safe** : Free from synthetic additives; ingredients are proven safe and effective for poultry use.

How it works?

- **Qualisperm** delivers a synergistic combination of bioactives that:
- **Boost Sperm Production** : Enhances sperm count semen volume and sperm viability
- **Improve Motility** : Increases sperm movement (better swimming ability).
- **Support Hormonal Health** : Elevates testosterone levels and reduces reproductive stress.
- **Defend Against Oxidative Damage** : Protects sperm DNA from environmental and physiological stressors.
- Supports fertility and hatchability by improving semen quality.

Dosage & Administration Guide :

Standard Dosage : 0.5g per bird per day

Target Animal : Breeding Rosters (Cocks / Cockerels)

Available Pack : 1 kg, 5 kg & 25 kg

Even Distribution : Ensure the powder is thoroughly mixed into the feed so each rooster gets its exact share, especially if groupfeeding.

Consistency : Administer daily during the breeding season or 2-3 weeks prior to mating / semen collection for optimum results. Or as directed by Consultant / Veterinarian.
